PRODUCT DESCRIPTION

ALLURE WALL 3D FEATURE CERAMIC TILES SERIES A VEINED STONE IN CERAMIC

Allure Wiggle conveys the strength, character and temperament of the stone on which this collection is inspired. The veins have been carefully treated to highlight the personality of this material. The result of this work is a set of captivating and aesthetic pieces that will beautify the space where they are installed. The series presents a Soft Bush Hammered surface that reproduces to the touch the characteristic texture of the natural material; which together with the four tones in which it is presented, extend the possibilities of combining the collection of collections Contemporary Mixtures Surfaces.

Another of the qualities of the Wave reliefs is the 3D.Fit technology. This technique ensures that the reliefs and grooves coincide with the graphic. This added to the carefully chosen relief surface, achieves an unprecedented richness in these new textures.

The richness of Allure surface is reinforced by the two new relief coatings. Wave and Wiggle are reliefs created from parallel and symmetrical lines. The surface is flat and the grooves are in the shape of a semicircle. Both are available in two graphics. Vein Cut, the graphic in favour of the grain that reveals the strata of the stone.
