PRODUCT DESCRIPTION

METALLIC ALLURE OF MODERN SOPHISTICATION WITH SURFACE

The audacity of metal An anthem to the iridescence of metal, for modern interiors and avant-garde architecture, the perfect blend of the daring look of metal and the unrivalled technical properties of ceramics.

The iridescence of mill scale gives the surface a tactile appeal, shaping the light to convey the ever-changing colour effect of the metal sheet. The metallic effect, in four colours, generates interplays of light and exquisite reflected glints, ideal for defining modern interiors and for avant-garde architectural projects.

Metal sheds the chilly image that once restricted it to the industrial mood to enter the eclectic world of living-spaces, designing their character with the aid of iridescent streaks, opalescent gleams and sophisticated colours, from black to slate grey, steel and white. The collection's eclecticism reaches its peak with MetalBrick, the 2x10 size tile inspired by the Raku technique, designed for use in high-impact combinations, and amplifying the collection's metallic characteristics and iridescent gleams. The Brick is available in five different colours - White, Grey, Blue, Green and Black
