PRODUCT DESCRIPTION

AUTHENTIC NATURAL STONE BLUE DE SAVOIE MARBLE MOLDINGS

Blue de Savoie marble is a luxurious natural stone known for its striking appearance. It originates from the Aosta Valley in the French Alps and is renowned for its beautiful blue-gray color, which can range from light to dark shades. The marble often features intricate veining, which can include white, grey, or even golden tones, giving it a unique and elegant look.

This marble is highly sought after for use in various high-end architectural and design projects, such as flooring, wall cladding, countertops, and even decorative items. Its durability and timeless beauty make it a popular choice for both modern and classical interiors.

Quarried in France, Blue de Savoie marble moldings are decorative elements made from the

same luxurious stone, used to enhance the architectural details of a space. These moldings can come in various profiles, such as baseboards, crown moldings, chair rails, and more.

They are often used to add a touch of elegance and sophistication to rooms, complementing the overall design. The unique blue-gray color and intricate veining of Blue de Savoie marble moldings can create a striking contrast or a harmonious blend with other materials, depending on the design intent.

These moldings are ideal for use in both residential and commercial settings, especially in areas where a high-end, refined aesthetic is desired. They are often paired with Blue de Savoie marble tiles or slabs to create a cohesive look throughout the space.
