## PRODUCT DESCRIPTION

### DESCRIPTION

#### THE FIRST CLASS NATURAL STONE PEGASUS WHITE MARBLE SLAB

Pegasus Marble is a high-end natural stone often used for countertops, flooring, and wall cladding. It typically features a white or light gray base with elegant veining in shades of gray, or grey, giving it a luxurious and timeless look.

When personality and elegance come together, the result is Pegasus, a type of white dolomite marble that originates from Brazil. Tinged with streaks of light gray, its chic linear vein pattern is almost reminiscent of wood grain. Recommended uses include kitchen countertops, indoor flooring and stairwell applications, plus other design projects.

Marble is a naturally occurring material sourced from mother nature herself. A range of character and color variation is to be expected and is a part of its inherent beauty. MMG tile & stone is well-known for its hands on approach during the sourcing process to properly control this range and variation so that the material not only maintains design integrity but also its inherent natural beauty.
