PRODUCT DESCRIPTION

DESCRIPTION

AUTHENTIC NATURAL STONE TRAVERTINE GOLD TILE

Travertine gold tiles are a type of natural stone tile known for their warm, golden tones and subtle variations in texture. They are made from travertine, a type of limestone formed from mineral springs, which gives the tiles a unique, earthy look. These tiles are commonly used in both residential and commercial projects for their durability and timeless aesthetic.

Travertine is a form of limestone deposited by mineral springs, especially hot springs. Travertine often has a fibrous or concentric appearance and exists in white, tan, cream-colored, and even rusty varieties. It is formed by a process of rapid precipitation of calcium carbonate, often at the mouth of a hot spring or in a limestone cave. In the latter, it can form

stalactites, stalagmites, and other speleothems. It is frequently used in Italy and elsewhere as a building material.

Travertine is a terrestrial sedimentary rock, formed by the precipitation of carbonate minerals from solution in ground and surface waters and geothermally heated hot-springs. Similar (but softer and extremely porous) deposits formed from ambient-temperature water are known as tufa.

Applications : Multiple Applications for Construction and Decorative Purposes, Commercial & Residential Building Projects, Exterior & Interior Countertops ,Flooring and Wall cladding, Offices, Bars, Bathrooms, Shopping Centers.

- WE SHIP NATIONWIDE
- CRATING SERVICES ARE AVAILABLE

PRODUCT DETAILS

MATERIAL	Travertine
STONE TYPE	Gold Antique
DESIGN	Field Tile
SHAPE	Square
CATEGORY	Classic Stones
APPLICATION	Floor and Wall
USAGE	Commercial and Residential
STYLE	Classic, Contemporary, Modern, Transitional
COLOR	Gold
TILE FINISH	Natural
THICKNESS	3/8"
EDGE	Micro-Beveled
PIECE PER BOX	6 pcs

SOLD BY	Full Box
AVAILABLE SIZES	16"x16"
ORIGIN	Turkey

ADDITIONAL INFORMATION

Weight	5.00 lbs
Dimensions	12.00 × 12.00 × 5.00 in
Finish	Natural
Color	Gold
Size	16"x16"
Make	Field Tile
Origin	Turkey
Thickness	3/8"
