DESCRIPTION

EXTRA PREMIUM QUALITY NATURAL STONE TRAVERTINE OCEAN BLUE SLAB

Ocean Blue Travertine is a type of natural stone that is known for its distinctive blue-gray coloration and beautiful veining. It's a variety of travertine, which is a sedimentary rock formed by the precipitation of calcium carbonate from water, often in and around mineral springs. Travertine typically has a porous structure, which can give it a unique appearance.

Ocean Blue Travertine gets its name from its color, which resembles the various shades of blue found in the ocean. It is a popular choice for interior and exterior applications, including flooring, wall cladding, countertops, and decorative features. Its natural beauty and versatility make it a sought-after material for both residential and commercial projects.

Ocean Blue Travertine is an exclusive type coming from single quarry located in Italy, It is iconic material with timeless beauty It is extracted in Tuscany and is available in very limited quantities. Ocean Blue Travertine has an elusive color with shades ranging from gray to blue and beige It is a material with excellent structural characteristics. This stone is often used to create a serene and coastal-inspired aesthetic in various design applications.
