PRODUCT DESCRIPTION

DESCRIPTION

AUTHENTIC NATURAL STONE ROMAN SILVER TRAVERTINE SLAB

Travertine is a form of limestone deposited by mineral springs, especially hot springs. Travertine often has a fibrous or concentric appearance and exists in white, tan, cream-colored, and even rusty varieties. It is formed by a process of rapid precipitation of calcium carbonate, often at the mouth of a hot spring or in a limestone cave. In the latter, it can form stalactites, stalagmites, and other speleothems. It is frequently used in Italy and elsewhere as a building material.

Roman Travertine is a terrestrial sedimentary rock, formed by the precipitation of carbonate minerals from solution in ground and surface waters and geothermally heated hot-springs. Similar (but softer and extremely porous) deposits formed from ambient-temperature water are known as tufa.

Applications : Multiple Applications for Construction and Decorative Purposes, Commercial & Residential Building Projects, Hospitals , Restaurants, Bars, Airports, Malls, Offices, Exterior Wall & Interior Flooring and Wall

MMG tile & stone stocks a wide variety to stone in our, Maryland distribution center.

PRODUCT DETAILS

MATERIAL	Travertine
STONE TYPE	Roman Silver

TYPE	Slab
PATTERN	Bookmatch - Available
CATEGORY	Exotic Stones
APPLICATION	Kitchen Countertop, Floors, Walls, Vanity Tops
COLOR	Beige With Gold Veins
FINISH	Polished - Honed
THICKNESS	2cm- 3/4" Inch
ORIGIN	Italy

ADDITIONAL INFORMATION

Finish	Honed, Polished
Thickness	2 cm
Origin	Italy
Color	Beige, Grey
Make	Slab
